

Table of Contents

Section 1: Introduction and Goals

- 1.1. Introduction
- 1.2. Goals and Objectives
- 1.3. Benefits of Pedestrian-friendliness

Section 2: Existing Needs

- 2.1 Introduction
- 2.2 Demographics
 - 2.2.1 General Town Analysis
- 2.3 Survey Results
- 2.4 Study Corridors
- 2.5 Focus Group Results
 - 2.5.1 Hispanic/Latino Focus Group
 - 2.5.2 Seniors Focus Group
 - 2.5.3 Transit Focus Group
- 2.6 Town Council Survey
- 2.7 Summary

Section 3: Existing Physical Conditions

- 3.1 Introduction
- 3.2 Roads
- 3.3 Sidewalks
- 3.4 Greenways
- 3.5 Transit
- 3.6 Destinations: Parks, Schools, and Shopping Centers
 - 3.6.1 Parks
 - 3.6.2 Schools
 - 3.6.3 Shopping Centers, Libraries, and Post Offices
- 3.7 Crash Analysis

Section 4: Existing Plans and Policies

- 4.1 Introduction
- 4.2 Existing Plans Analysis
- 4.3 Policies
 - 4.3.1 Sidewalk Request Program and Policies
 - 4.3.2 Sidewalk Maintenance Policy

Cary Pedestrian Plan

Table of Contents and List of Images, Figures, and Tables

- 4.3.3 Traffic Calming Program and Policy
- 4.3.4 Connectivity Policies
- 4.3.5 Greenway Policies

Section 5: Best Practices

- 5.1 Introduction
- 5.2 Design Guidelines
 - 5.2.1 Sidewalk Construction
 - 5.2.2 Sidewalk Design
 - 5.2.3 Pedestrian Crossings
- 5.3 Special Considerations
 - 5.3.1 Downtown Cary
 - 5.3.2 Schools and School Zones
 - 5.3.3 Curb Extensions (Bulb-outs) and Curb Radii
 - 5.3.4 Medians and Refuge Islands
 - 5.3.5 Parking Lot Design
 - 5.3.6 Construction Zones
- 5.4 Recommendations

Section 6: Future Projects

- 6.1 Introduction
- 6.2 Existing Proposed Projects
 - 6.2.1 Roadway Projects
 - 6.2.2 Sidewalk
 - 6.2.3 Greenways
- 6.3 Project Recommendations

Section 7: Program Recommendations

- 7.1 Introduction
- 7.2 Program Recommendations
 - 7.2.1 Education
 - 7.2.2 Encouragement
 - 7.2.3 Enforcement
- 7.3 Prioritization

Section 8: Partnerships and Funding

8.1 Introduction

8.2 Funding and Partnerships

8.3 The Future

Appendix 6: Existing Plans Summary

List of Images, Figures, and Tables

Section 1: Introduction and Goals

Figures

Figure 1-1. An example of Cary's pedestrian amenities in downtown Cary.

Figure 1-2. Pedestrian amenities in Downtown.

Section 2: Existing Needs

Images

Image 2-1. A runner crosses the intersection at Walnut and Maynard. As the number of pedestrians increases in the Town, the Town will need to develop education programs that encourage pedestrians and motorists to interact safely.

Image 2-2. As part of the Plan's public involvement effort, a booth was set up at Cary's 2005 Earth Day at Spring Daze and Pedestrian Plan surveys were distributed to participants.

Image 2-3. The Hispanic Focus Group meeting was held at Briarcliff Elementary School, where the Briarcliff Hispanic and Latino Parents group holds their monthly meetings.

Figures

Figure 2-1. Focus areas and potential projects developed from comments received during the Hispanic Focus Group meeting.

Figure 2-2. View of the gardens behind the Cary Senior Center, where the Seniors Focus Group was held.

Figure 2-3. Focus areas and potential projects that developed out of the comments received during the Seniors Focus Group meeting.

Figure 2-4. A passenger boards one of Cary's C-Tran buses. One of the focus group meetings targeted transit and transit rider needs.

Figure 2-5. Some of the potential projects that developed out of comments received during the transit focus group meeting.

Section 3: Existing Physical Conditions

Images

Image 3-1. Chatham Street is one of Cary's major connecting routes. As seen in this image, it has some sidewalk and pedestrian facilities, but they could be improved.

Image 3-2. This sidewalk along Kildaire Farm Road is a typical example sidewalk conditions in Cary. Not that the shrubbery has been courteously trimmed so as not to obstruct travel.

Image 3-3. The Northwoods Trail, next to Northwoods Elementary, is an example of a typical greenway facility in Cary.

Image 3-4. Weatherstone Elementary is one of the schools in Cary with well-developed pedestrian access.

Figures

Figure 3-1. Map of major roads in Cary as of January 2007.

Figure 3-2. Map of sidewalk in Cary as of January 2007.

Figure 3-3. Map of greenways in Cary as of January 2007.

Figure 3-4. A C-Tran bus waits for passengers at a downtown bus stop. It is important that pedestrian facilities near transit stops are accessible and convenient.

Figure 3-5. C-Tran bus stops and routes in Cary as of January 2007.

Figure 3-6. A shelter at Cary's Bond Park. Parks are important destinations for pedestrians.

Figure 3-7. Map of park locations in Cary as of January 2007.

Figure 3-8. Map of school locations in Cary as of January 2007.

Figure 3-9. Activity centers, post offices, and libraries in Cary as of January 2007.

Figure 3-10. Map of pedestrian-vehicle crashes in Cary, January 2002 – to June 2005.

Tables

Table 3-1. Crash by type for the Town of Cary 2002 –mid 2005.

Table 3-2. Comparison of Cary crashes to other North Carolina cities, 2002 – 2004.

Section 4: Existing Plans and Policies

None.

Section 5: Best Practices

Images

Image 5-1. Examples of various types of sidewalk material used in Cary. The top image is a combination brick and gravel decorative paver used in downtown. The bottom image is the more typical concrete sidewalk used elsewhere in Cary. Other materials besides concrete, such as rubber and asphalt, can be used to reduce the likelihood of cracking.

Image 5-2. The pedestrian crossing at the Kildaire Farm and Maynard Road intersection. Note the marked crosswalk and pedestrian-activated signals. These are standard features which should be installed with each new signal.

Image 5-3. Top Image: An example of pedestrian-activated signalized mid-block crossing. Bottom image: A guide for pedestrian to understand the meaning of the push-button signals.

Image 5-4. The greenway underpass at Kildaire Farm and High Meadow. An underpass is one form of pedestrian crossing.

Image 5-5. Sidewalk in Downtown Cary, wide enough to support the occasional outdoor cafe.

Image 5-6. A school zone sign on Harrison Ave. in Cary. School zones should be established around all schools in Cary to create a safe walking environment for students.

Image 5-7. Example bulb-out placement to reduce curb radii and shorten travel distance for pedestrians crossing an intersection.

Image 5-8. An example of good median and refuge island design.

Image 5-9. An example of pedestrian-friendly parking facility design.

Image 5-10. Poor pedestrian access at a construction zone in Cary.

Image 5-11. Adapted from Sample Signage Plan for Temporary Pedestrian Closure (MUTCD, Figure 6H - 29).

Figures

Figure 5-1. A proposed multi-use trail along Regency Parkway from Symphony Lake Greenway to Swift Creek Trail.

Figure 5-2. A diagram of various crossing treatments Cary can consider to improve pedestrian accessibility and safety crossing the street.

Tables

Table 5-1. Recommended horizontal illumination requirements for land uses.

Table 5-2. Priority recommendations for changes to Cary's policies, standards, and design guidelines to help implement best practices for pedestrians.

Section 6: Future Projects

Figures

Figure 6-1. Current roadway construction projects in Cary will include new sidewalk.

Figure 6-2. Map of Cary's existing planned, funded, or in construction projects as identified in the FY 2007 – 2016 Capital Improvements Plan, Sidewalk Construction Program, and Parks, Recreation, and Cultural Resources Plan.

Figure 6-3. Map of the locations of the top priority corridor projects in reference to on-going and planned projects in the Town. The numbers associated with each project correspond with the reference numbers in Table 6-5.

Figure 6-4. Map of locations of priority intersection improvement projects in the Town relative to on-going and planned projects. The numbers associate with each intersection correspond with the reference numbers in Table 6-6.

Tables

Table 6-1. Funded transportation projects as listed in Cary's FY 2007 – 2016 Capital Improvements Plan.

Table 6-2. Currently funded sidewalk request projects (September 2006).

Table 6-3. Greenway priority projects in Cary's Parks, Recreation, & Cultural Resources Master Plan (2003).

Table 6-4. January 2007 budgeted or in construction greenway projects.

Table 6-5. Top priority corridor projects.

Table 6-6. Top priority crossings improvement projects.

Section 7: Program Recommendations

Figures

Figure 7-1. Weatherstone Elementary is one of the schools in Cary that would be eligible for Safe Routes to School funds.

Figure 7-2. Cary's Bike + Hike Map serves both as a map and as an educational tool for bicycle safety. The Town should also consider preparing similar materials for pedestrian safety.

Figure 7-3. The SmartCommute Challenge is one of the Triangle-wide activities to encourage alternative forms of transportation, including walking.

Figure 7-4. The Northwoods Trail is one of Cary's many greenways. It serves not only as a recreational facility but also as access to Northwoods Elementary.

Cary Pedestrian Plan

Table of Contents and List of Images, Figures, and Tables

Figure 7-5. Cary Elementary is one of the schools in the Town that already has a crossing guard. It is recommended that all schools have crossing guards and school zone monitors to make it safer for students to walk to school.
