

Section	Page
Abbreviations and Acronyms	vii
Executive Summary	ES-1
Water Resources Supply and Infrastructure.....	ES-1
Changing Land Uses and Development Patterns.....	ES-3
Identifying the Needs of the Future	ES-4
The Planning Process	ES-9
The Water Resources Portfolio.....	ES-9
Implementation Plan	ES-10
1 Introduction	1-1
1.1 Long Range Water Resources Plan Update Approach.....	1-1
1.2 The Regional Setting	1-2
1.2.1 Triangle Water Supply Partnership and the Future.....	1-2
1.2.2 Regional Growth Planning	1-3
1.3 Water Resources Infrastructure for the Towns of Cary, Apex, Morrisville, and RTP South.....	1-3
2 Identifying the Needs for the Future	2-1
2.1 Historical Water Demand	2-1
2.1.1 Town of Cary	2-1
2.1.2 Town of Apex	2-4
2.2 Future Water Demand.....	2-4
2.2.1 Demands Development	2-7
2.2.2 Projected Future Water Demands.....	2-8
2.3 Water Demand vs. Water Supply Capacity.....	2-12
2.4 Future Wastewater Flows.....	2-13
2.5 Wastewater Flows vs. Treatment Capacity	2-14
2.6 Interbasin Transfer.....	2-15
2.7 Required Discharge.....	2-17
2.8 Reclaimed Water	2-19
3 The Planning Process	3-1
3.1 Recommendations Implemented from the 2013 LRWRP.....	3-1
3.2 Updating the Water Resources Portfolio.....	3-1
3.3 Current Customer Thoughts on Water Use and Conservation.....	3-2
4 Water Resources Portfolio	4-1
4.1 Strategy 1—Increase Water Supply via Jordan Lake Allocation	4-7
4.1.1 Potential Raw Water Supply Capacity	4-7
4.1.2 Implementation Requirements.....	4-7
4.1.3 Regulatory Considerations.....	4-8
4.1.4 Policy Implications	4-8
4.1.5 Key Uncertainties.....	4-8
4.1.6 Key Benefits	4-8
4.2 Strategy 2A—Increase Jordan Lake Water Supply Pool.....	4-8

4.2.1	Potential Raw Water Supply Capacity	4-9
4.2.2	Implementation Requirements.....	4-9
4.2.3	Regulatory Considerations.....	4-9
4.2.4	Policy Implications	4-10
4.2.5	Key Uncertainties.....	4-10
4.2.6	Key Benefits	4-10
4.3	Strategy 2B—Water Supply from Crabtree Creek with Storage in Existing Triangle Quarry	4-10
4.3.1	Potential Raw Water Supply Capacity	4-11
4.3.2	Implementation Requirements.....	4-11
4.3.3	Regulatory Considerations.....	4-12
4.3.4	Policy Implications	4-12
4.3.5	Key Uncertainties.....	4-12
4.3.6	Key Benefits	4-12
4.4	Strategy 2C—Water Supply from Cape Fear River Watershed.....	4-13
4.4.1	Potential Raw Water Supply Capacity	4-13
4.4.2	Implementation Requirements.....	4-13
4.4.3	Regulatory Considerations.....	4-14
4.4.4	Policy Implications	4-14
4.4.5	Key Uncertainties.....	4-14
4.4.6	Key Benefits	4-14
4.5	Strategy 2D—Water Supply from a Source Outside the Triangle.....	4-14
4.5.1	Potential Raw Water Supply Capacity	4-15
4.5.2	Implementation Requirements.....	4-15
4.5.3	Regulatory Considerations.....	4-15
4.5.4	Policy Implications	4-15
4.5.5	Key Uncertainties.....	4-15
4.5.6	Key Benefits	4-15
4.6	Strategy 3—Increase Water Supply and/or Storage via Interconnections.....	4-15
4.6.1	Potential Finished Water Capacity.....	4-16
4.6.2	Implementation Requirements.....	4-16
4.6.3	Regulatory Considerations.....	4-16
4.6.4	Policy Implications	4-16
4.6.5	Key Uncertainties.....	4-17
4.6.6	Key Benefits	4-17
4.7	Strategy 4—Increase Master Planning and Strategic Utility Resource Utilization	4-17
4.7.1	Potential Raw Water Supply Capacity	4-17
4.7.2	Implementation Requirements.....	4-17
4.7.3	Regulatory Considerations.....	4-18
4.7.4	Policy Implications	4-18
4.7.5	Key Uncertainties.....	4-18
4.7.6	Key Benefits	4-18
4.8	Strategy 5A—Supply Side Management: Optimize Internal Operations.....	4-18
4.8.1	Potential Raw Water Supply Capacity	4-19
4.8.2	Implementation Requirements.....	4-19
4.8.3	Regulatory Considerations.....	4-20
4.8.4	Key Uncertainties.....	4-20
4.8.5	Other Considerations.....	4-21
4.8.6	Key Benefits	4-21
4.8.7	Cost	4-21

4.9 Strategy 5B—Demand Side Management - Manage Customer Demands for Improved Efficiency 4-21

4.9.1 Price-Based Demand Side Management 4-21

4.9.2 Alternative Demand Side Management (Non-Price-Based) 4-22

4.9.3 Potential Raw Water Supply Capacity 4-22

4.9.4 Implementation Requirements 4-23

4.9.5 Regulatory Considerations 4-23

4.9.6 Policy Implications 4-23

4.9.7 Key Uncertainties 4-23

4.9.8 Key Benefits 4-23

4.10 Strategy 5C—Reclaimed Water 4-23

4.10.1 Potential Finished Water Demand Reductions 4-24

4.10.2 Implementation Requirements 4-24

4.10.3 Regulatory Considerations 4-24

4.10.4 Policy Implications 4-24

4.10.5 Key Uncertainties 4-24

4.10.6 Key Benefits 4-25

4.11 Water Resources Portfolio Summary 4-25

5 Implementation Plan 5-1

5.1 Water Supply and Treatment 5-1

5.2 Wastewater Treatment 5-2

5.3 Monitoring and Reappraisal of the Water Resources Portfolio 5-4

6 References 6-1

Appendixes

- Appendix A Water Use Analysis
- Appendix B Forecast of Water and Wastewater Demands
- Appendix C Customer Survey and Water Use Efficiency Evaluation
- Appendix D Reclaimed Water Business Case Evaluation

Tables

ES-1 Historical and Projected Population for the Town of Cary Service Area ES-4

ES-2 75th Percentile Wastewater Flow Projections by Water Reclamation Facility, 2016 to 2065, MGD, Maximum Month Average Day ES-7

ES-3 Strategies for Meeting Water Supply Needs ES-13

ES-4 Summary of Water Resources Portfolio Recommended Actions ES-12

ES-5 Summary of Wastewater Treatment Recommended Actions ES-12

2-1 Historical and Projected Town Populations 2-5

2-2 Projected ICI Development 2-6

2-3 Mixed Use Development Components of Future Customer Types 2-6

2-4 75th Percentile Total Water Demand Projections by Jurisdiction, 2016 to 2065, MGD 2-9

2-5 75th Percentile Finished Water Demand Projections by River Basin, 2016 to 2065, MGD, Annual Average Day 2-10

2-6 75th Percentile Wastewater Flow Projections by Water Reclamation Facility, 2016 to 2065, MGD, Annual Average Day 2-13

2-7 75th Percentile Wastewater Flow Projections by Water Reclamation Facility, 2016 to 2065, MGD, Maximum Month Average Day 2-14

CONTENTS

2-8 75th Percentile IBT Projections—Total by Jurisdiction and River Basin, 2016 to 2065, MGD, Maximum Month Average Day 2-17

2-9 25th Percentile Required Discharge Projections by Jurisdiction, 2016 to 2065, MGD, Annual Average Day 2-18

2-10 50th Percentile Required Discharge Projections by Jurisdiction, 2016 to 2065, MGD, Annual Average Day 2-18

2-11 75th Percentile Required Discharge Projections by Jurisdiction, 2016 to 2065, MGD, Annual Average Day 2-19

2-12 75th Percentile Total Reclaimed Water Demand Projections by Service Area, 2016 to 2065, MGD, Annual Average Day 2-20

2-13 75th Percentile Total Reclaimed Water Demand Projections by Service Area, 2016 to 2065, MGD, Maximum Day..... 2-20

3-1 2017 Customer Survey Profile of Respondents 3-3

3-2 Customer Preferences for Water Efficiency Communication Methods 3-3

3-3 2017 Customer Preferences for Water Emergency Communications..... 3-4

3-4 Aquastar Data 3-4

3-5 2017 Customer Indoor Water Conservation Actions..... 3-5

4-1 Strategies for Meeting Water Needs 4-3

4-2 75th Percentile Raw Water Demand Projections by Jurisdiction, 2016 to 2065..... 4-7

4-3 Summary of Existing Potable Water Interconnections and Potential Water Supply Purchase Agreement Partners..... 4-16

4-4 Cary/Apex WTF Process Waste Recovery Potential, MGD, Annual Average Day..... 4-19

4-5 Summary of Water Resources Portfolio Recommended Actions 4-25

5-1 Summary of Water Supply and Treatment Portfolio Recommended Actions..... 5-1

5-2 Summary of Wastewater Treatment Recommended Actions..... 5-2

Figures

ES-1 Service Areas for the Towns of Cary and Apex ES-2

ES-2 Annual Average Day Raw Water Demand Gap ES-5

ES-3 Maximum Day Finished Water Demand Projections..... ES-6

ES-4 Interbasin Transfer to the Neuse River Basin Projections, Maximum Month Average Day..... ES-8

ES-5 Interbasin Transfer to the Cape Fear River Basin Projections, Maximum Month Average Day. ES-8

ES-6 The LRWRP Update Planning Process..... ES-9

ES-7 Timeline for Need for Additional Raw Water Supply ES-11

ES-8 Timeline for Need for Additional Finished Water Capacity ES-11

1-1 The LRWRP Update Planning Process..... 1-2

1-2 Service Areas for the Towns of Cary and Apex 1-5

2-1 Daily Finished Water Demand—1997–2016 2-2

2-2 Comparison of Annual Population and Water Demand Growth—2001–2016 2-3

2-3 Town of Cary 2016 Demand by Customer Type, Average Day Metered Demand, MGD 2-4

2-4 Expected Customer Types by 2065..... 2-7

2-5 Projected Raw Water Demands, Average Annual Day, 75th Percentile..... 2-11

2-6 Projected Finished Water Demands, Maximum Day, 75th Percentile 2-11

2-7 Projected Average Day Raw Water Supply Demands and Projected Gap 2-12

2-8 Projected Maximum Day Finished Water Demands and Projected Capacity Gap 2-13

2-9 Projected Interbasin Transfer to the Neuse River Basin, MMAD 2-16

2-10 Projected Interbasin Transfer to the Cape Fear River Basin, MMAD 2-16

3-1 Water Conservation Plan Update Phasing..... 3-2

4-1 Jordan Lake Storage Diagram 4-9

4-2 Wake Stone Corporation Triangle Quarry Location.....4-11

5-1 Timeline for Need for Additional Raw Water Supply5-3

5-2 Timeline for Need for Additional Finished Water Capacity.....5-3

5-3 Town of Apex to Town of Cary Ratio of Finished Water Demands5-4
